

## **The Long Tide: The Bioelectric Ordering field and Primal and Fluid Midlines**

### **Post-Graduate Seminar 2**

With Tanya Desfontaines

2<sup>nd</sup> – 6<sup>th</sup> October 2020

In this post-graduate seminar, we will explore in greater depth the emergence of embryological forces in session work with an orientation to the primal midline and local bioelectric ordering field. Trauma work continues with the Orienting response, working with the cervical spine and inhalation stillpoint processes to augment the expression of potency through the fluid midline. All explorations are held within the vast and stable support of the Long Tide and Dynamic Stillness.

As a consequence of restrictions imposed due to the Coronavirus pandemic, it will not be possible for me to travel to the Netherlands at this time, so we must think creatively and make the most of this opportunity to experience working with Biodynamics through the vast and ever-present field which interconnects and supports us.

The course will be held by myself from here in the UK, on Zoom, with Nienke and assistants in the PCSA as usual. I will be guiding the group in meditation, giving teaching and sharing images from my screen and will also lead some exercises with the group via the Zoom platform.

There will also be the possibility to experience a 'remote' demo session – you will be surprised at what is possible to sense when working in this way. Please note that I will not be teaching 'distance' work, simply using this tool as an experiential learning point. Nienke will also give some live demos, and we will hold the table work as a team, as we usually do.

I hope that you will feel inspired to join us as this promises to be a rich and rewarding exploration of the biodynamic fields and formative forces of life.
